Artone TVB Optical TV - Hearing Aid Transmitter

Artone TVB is a powerful TV transmitter that goes beyond just increasing volume. It transmits high-fidelity audio directly to your hearing aids or cochlear implants, specifically addressing the challenges faced by those with hearing loss.

- **Exceptional Speech Clarity:** Enjoy crisp, rich sound with clear emphasis on dialogue, transmitted directly to your hearing device. Say goodbye to muffled voices and distorted sound effects. Now you can finally understand every word and follow the story with ease.
 - **Reduced Background Noise:** Focus on the program, not distracting background noise. Artone TVB minimizes ambient noise interference, ensuring you hear every detail of the dialogue with exceptional clarity.
 - **Personalized Listening Experience:** Adjust the volume to your specific needs directly on your hearing aids or cochlear implants. This allows you to enjoy comfortable listening levels without disturbing others.
 - **Multiple Connection Options:** The Artone TVB connects seamlessly to a wide range of televisions using either optical or analog audio outputs.
-
